

IMPACT is supported by the European Community under the FP7 ICT Work Programme. The project is coordinated by the National Library of the Netherlands.

Scalable and sustainable – OCR & document image analysis in the cloud

New Trends in Humanities Computing

Lotte Wilms – Koninklijke Bibliotheek, IMPACT Project

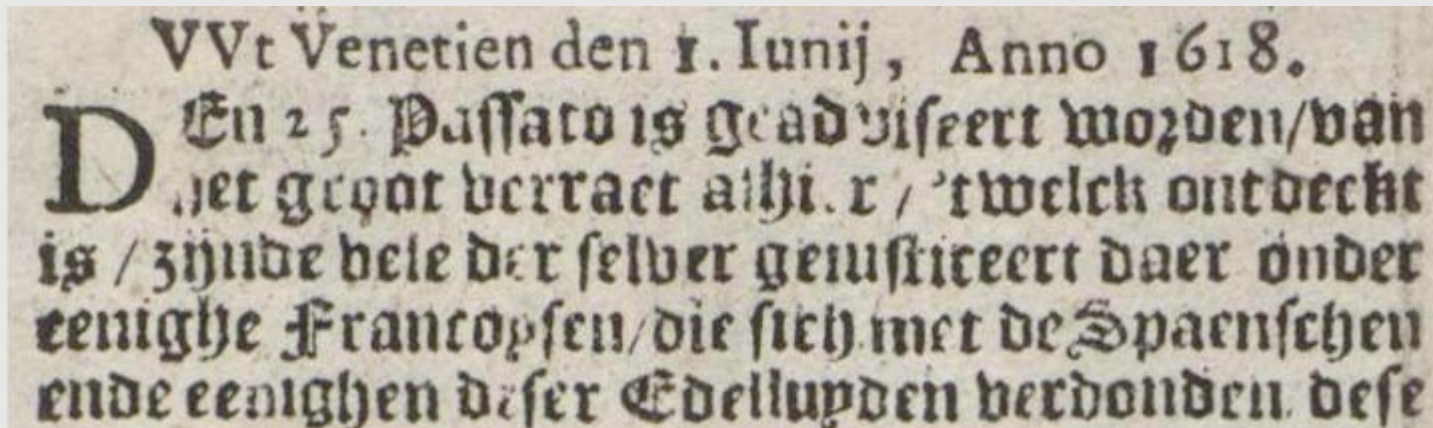

René van der Ark – Koninklijke Bibliotheek, Research programmer

Clemens Neudecker – Koninklijke Bibliotheek, Technical Project Manager IMPACT

Background: KB Digital Library Programme

- Goal: Offer everyone access to everything published in and about the Netherlands through the internet
- 2013: 10% of the publications published in and about the Netherlands available in digital form
- Example projects:
 - Historical Newspapers – <http://kranten.kb.nl>
 - Dutch Parliamentary Papers – <http://www.statengeneraaldigitaal.nl/>
 - Early Dutch Books Online – <http://www.earlydutchbooksonline.nl>
- Timeframe covered: 1618 - 1995

Optical Character Recognition

VVt Venetien den 1. Junij, Anno 1618.

Answering the challenges – IMPACT

- IMPACT – Improving Access to Text (2008 – 2011)
Large-scale integrating research project, funded by the EC
 - Consortium of 26 partners
 - Coordinated by the National Library of the Netherlands (KB)
 - EU funding: € 12 100 000 (FP7 ICT Work Programme)
 - From 2012: sustainable Centre of Competence with alternative resources

- Main objectives:
 - Innovate OCR technology
 - Capacity building in mass-digitisation

IMPACT Solutions

- From a technical perspective:
 - > 20 software toolkits for solving different problems
 - Such as:
 - OCR (C++, C#),
 - Image Processing & Lexica (DLL),
 - Command Line Tools (Win/Linux),
 - Java, Ruby, PHP, Perl, etc.
- IMPACT Interoperability Framework (IIF)

Architecture

- IMPACT Interoperability Framework: Technologies
 - Java 6
 - Generic Web Service Wrapper
 - Apache Maven
 - Apache Tomcat
 - Apache Axis2
 - Apache Synapse
 - Taverna Workflow Engine

- IMPACT Interoperability Framework: Dataset
 - Hosted in the UK
 - PHP/MySQL database, frontend for search
 - approx. 5 TB raw data (images, text files, metadata) and growing

How does it work?

 Digitisation/OCR challenges registered and tagged in database

→ Warped text

 Database contains 99,95% correct result: “ground truth”

IMPACT Repository :: Evaluation Set :: Document Details

PAGE Page Content
Groundtruth [77.25 KB]

[Click image for a full resolution JPEG preview](#)

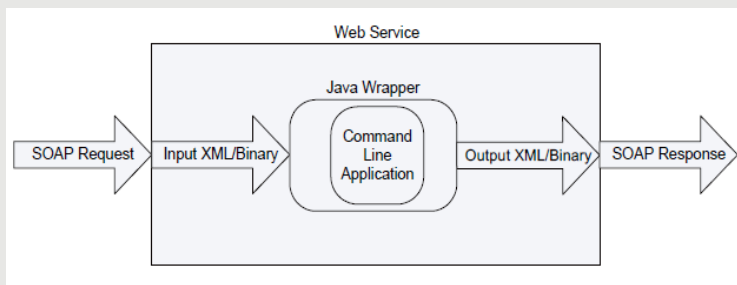

[Download original image](#)

How does it work?

 Researcher develops new method to tackle a problem

 Research prototype is wrapped to a SOAP web service

How does it work?

 Web service is integrated as a workflow module

 Workflow module can be evaluated, based on the ground truth

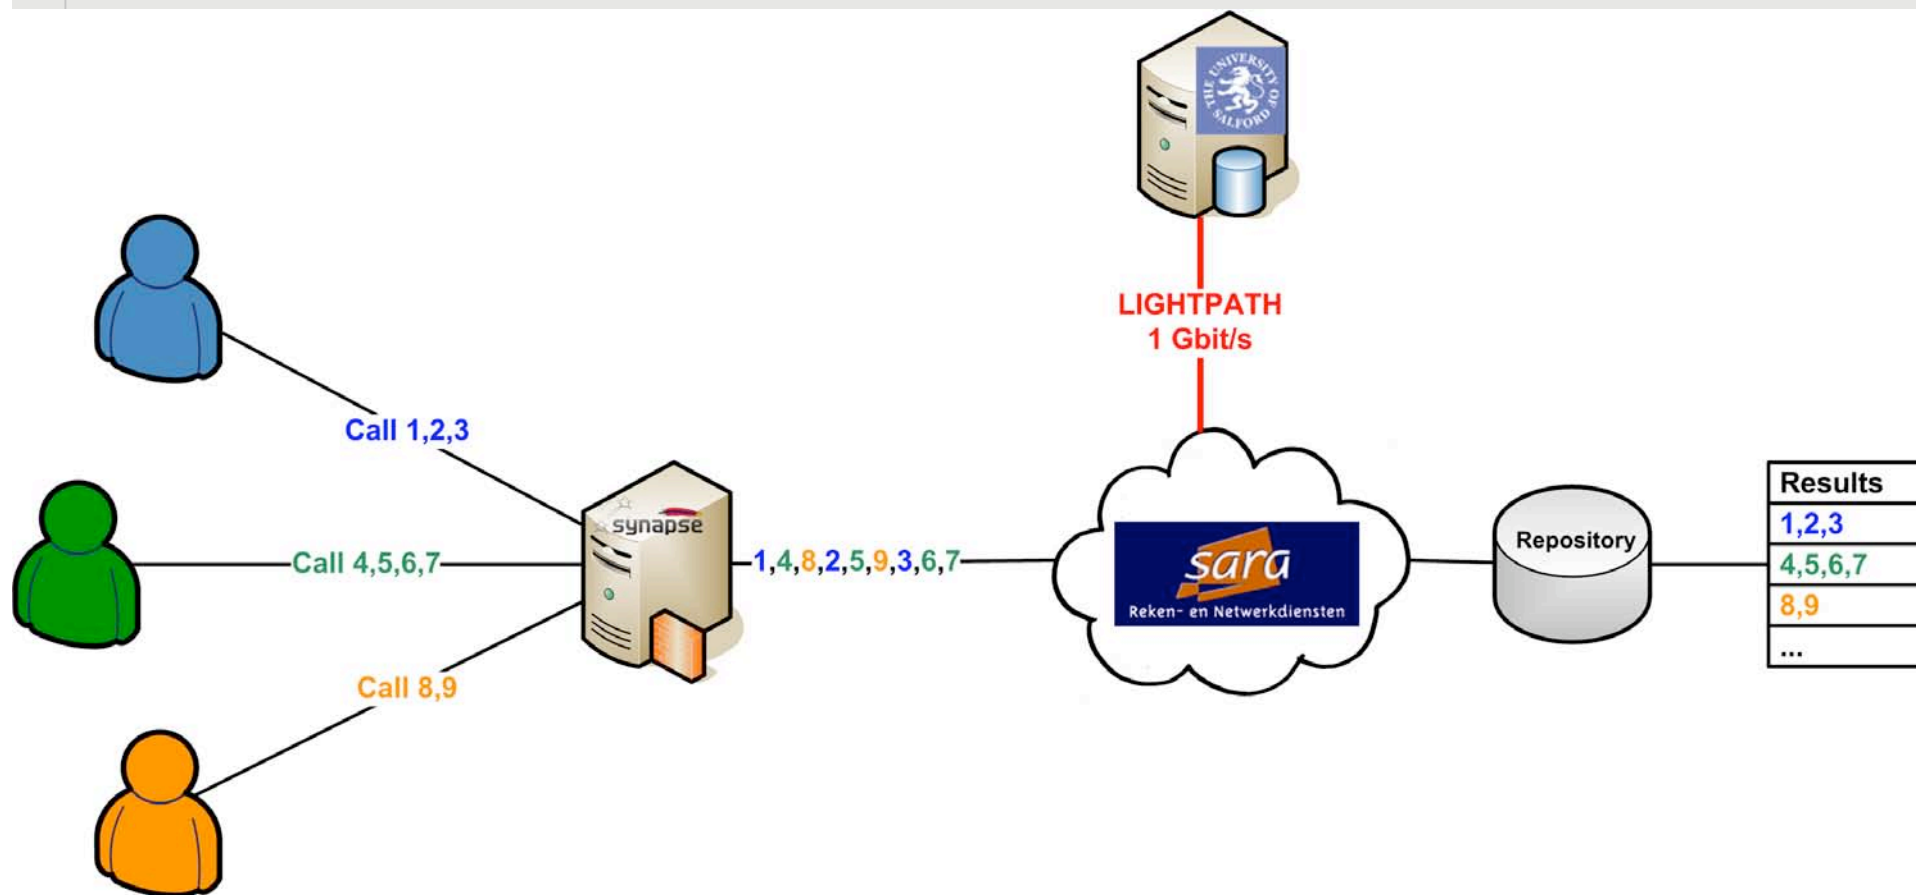

Current setup

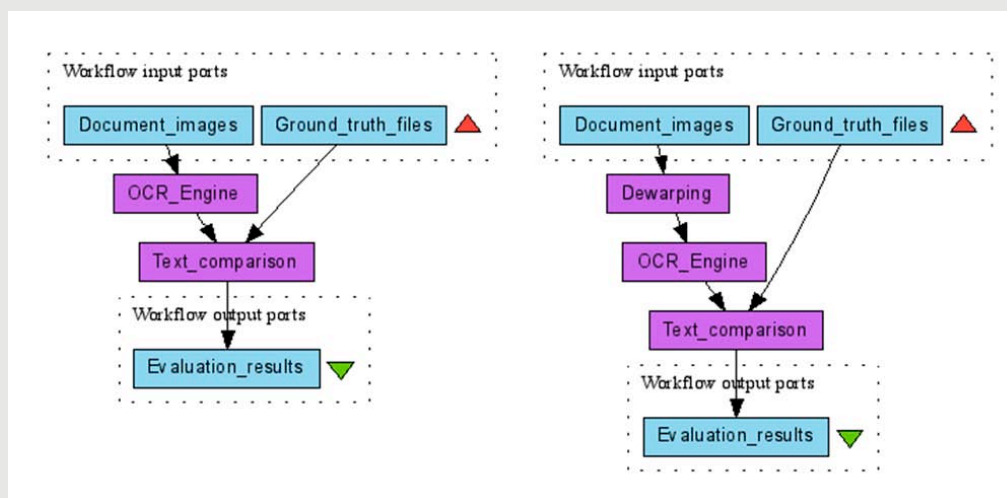

Proposed setup

Benefits

- Scalable platform
- Availability of resources to a large number of users
- Enable research into scalable computing for OCR & DIA
- Consolidation of support and maintenance
- Various interfaces (web/local)
